

ProView™ LD80 Connector Holder

FIBER END FACE INTERFEROMETER & MICROSCOPE

The ProView LD80 Connector Holder is a replacement part for the NorthLab's ProView line of products to support inspection of non-angle polished LD80 type connectors. Typically, the holder is pre-mounted on the base plate on delivery of the base unit.

The LD80 connector is a high-power fiber-optic connector with a 4 mm ferrule in a threaded body.

The size of the area inspected is not determined by the connector holder but on which ProView base unit model it is mounted (see separate specification of each model).

Key Features

- Supports non-angle polished LD80 connectors
- Compatible with all ProView base unit models
- Replacement requires software recalibration

Technical Specifications

Dimensions:	33(w) x 29(D) x 33(H) mm
