

# ProView™ ST/PC Connector Holder

FIBER END FACE INTERFEROMETER & MICROSCOPE

The ProView ST/PC Connector Holder is a replacement part for the NorthLab's ProView line of products to support inspection of non-angle polished ST/PC type connectors. Typically, the holder is pre-mounted on the base plate on delivery of the base unit.

The ST/PC connector is a straight tip fiber-optic connector with a 2.5 mm ferrule in a bayonet style body. A key is used to control the rotation when inserted.

The size of the area inspected is not determined by the connector holder but on which ProView base unit model it is mounted (see separate specification of each model).

## Key Features

- Supports non-angle polished ST and ST/PC connectors
- Key used to control rotation when inserted
- Compatible with all ProView base unit models
- Replacement requires software recalibration

## Technical Specifications

<b>Dimensions:</b>	33(w) x 29(D) x 33(H) mm
